internet reservations

Parking fee payment:
quick and simple via
ticket or license plate
number

RFID ticket issuance:
contactless access,
wide variety of new
applications

Remote assistance: Offer
remote support, live and
personalized

skiosk® Lite 'Parking': designed for maximum cost effectiveness and profitability

Cashless payment made easy, fast and secure

The cashless digital kiosk simplifies accounting and ensures greater security, as the handling of bills and coins is eliminated. Numerous methods of payment through the use of barcode and RFID readers (as well as touchscreens and powerful credit card/ debit card terminals) are supported.

18.5 inch touchscreen: operating cockpit, information and advertising space in one

The full-screen touch display in HD and color combines an exceptional ease of use with a wealth of information for your customers. The split-screen function creates advertising space and an additional source of income for you. By touching the user interface or inserting the ticket, the display automatically switches between advertising and operating modes.

Individual details make the difference. Information on tariffs, tips on the surroundings, weather, etc. can be provided via a link on the display.

One-touch operating concept, and user-friendly for people with disabilities

The intuitive One-touch operating concept scores with its easy usability. The split screen with ergonomic height adjustment and optimally positioned control elements is designed to accommodate different person sizes and mobility restrictions. A special amplifier enables the use of the audio system in AFILS-compatible hearing aids to provide improved intelligibility and sound quality.

RFID: contactless access, wide variety of applications

Give your customers the pleasure of contactless entry and exit - a practical service enhancement, especially for long-term parkers. In addition, RFID data carriers can be used for supplementary services, such as admission cards for events.

Parking and payment via license plate

The skiosk Lite can be used in combination with automatic license plate recognition for efficient access management. The license plate number acts as a payment reference and is entered at the digital kiosk to calculate parking fees.

Discover the possibilities

Pick-up service for internet reservations

The modern barcode scanner enables a brand new method of ticket delivery: your customers can conveniently pick up tickets reserved on the internet (using Print@Home or their mobile phone) at the skiosk Lite 'Parking.' The reservation code is redeemed and the RFID data carrier issued right at the digital kiosk.

Your benefit: practical online self-service for your customers – offers time and location flexibility and constant availability

reserve from home

scan reservation

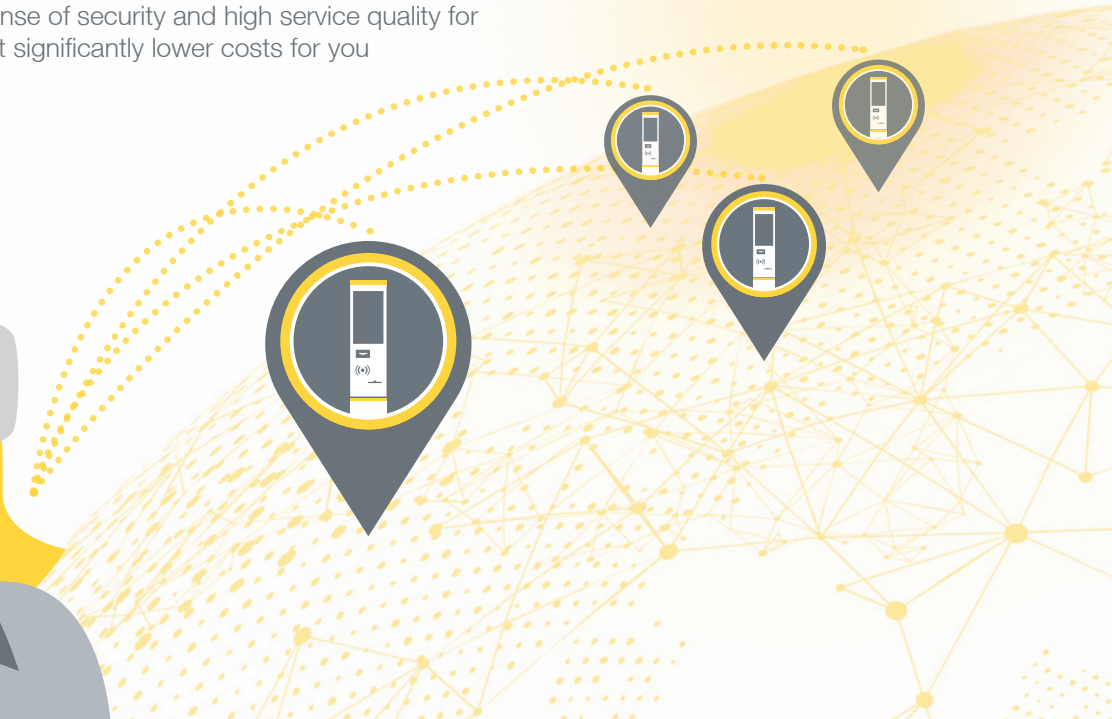

receive ticket

Remote assistance: offer remote support, live and personalized

Personalized customer service, without being on site: A bi-directional intercom combined with technically advanced remote device operation (video optional) makes it possible. From the control center, you are digitally present in the garage and can remotely carry out operating steps for your customers as needed – making the live support even more personal.

Your benefit: a sense of security and high service quality for your customers, at significantly lower costs for you

Intelligent technology meets added economic value

Design quality both inside and out

Extra large, extra special: features such as the full-surface touch function and the handy product overview on the 10.4 inch or optional 18.5 inch display take the user interface and ease of operation to a new level. Carefully selected materials enhance an appealing device design.

Your benefit: Intuitive concept for a high level of operating comfort, superior quality, robustness and excellent product life

Profit enhancing multipurpose

The large-format display can be used for your own promotional purposes or can be sold to business partners as an advertising space. In addition, individual tickets for people access (for example, to observation terraces) can be integrated into the multifunctional vending machines.

Your benefit: Establish and expand business partnerships to generate additional income

Low-maintenance operation

The well-matched capacities for barcode and RFID ticket quantities and the large-sized receipt paper roll minimize maintenance operations and staffing requirements.

Your benefit: Lower operating costs thanks to the optimized use of personnel deployment

Base heights

Choose from four different device heights for user friendly and handicap-accessible operating heights.

Your benefit: A selection to satisfy your needs and in line with international standards

Extensive system networking

Control and monitoring are performed centrally. Comprehensive system networking ensures a high degree of serviceability.

Your benefit: A consolidated overview, the ability to manage proactively and to respond quickly to support and maintenance needs

Valuable safety aspects

Sophisticated ticketing and counterfeit-proof data carriers make the skiosk Lite 'Parking' your reliable business partner.

Your benefit: Revenues can be checked and tracked; targeted prevention of theft and misuse through the use of high-quality materials

Reliability

SKIDATA Expert Services include all services offered by SKIDATA both for the operation of your system as well as for the decision making and implementation phases.

Your benefit: With subsidiaries and numerous partners, SKIDATA is present in more than 100 countries. One of our strategically located service centers is also close to you

Your skiosk® Lite grows with your business ideas

skiosk Lite offers a wide range of optional features. If the model you have configured no longer meets your business requirements, you can simply enhance the device at that time.

Your benefit: The highest level of investment protection. Easy hardware expandability, e.g. upgrading to an extended screen or accepting additional data carriers like Print@Home or RFID; supports new business models and various business partner cooperations
